PROFESSIONAL SUMMARY

Data Analyst / Data Scientist with hands-on experience in data analysis, machine learning, predictive modeling, and dashboard development. Skilled in Python, SQL, Power BI, and Excel, with experience building end-to-end analytics solutions across healthcare, fraud detection, and marketing domains. Experienced in data preprocessing, exploratory data analysis (EDA), feature engineering, model deployment, and transforming complex data into actionable business insights.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java

Data Analysis & Visualization: Pandas, NumPy, Tableau, Matplotlib, Seaborn, Excel (XLOOKUP, VLOOKUP, Pivot Tables, IF, ABS), Power BI (Power Query, DAX, KPI Development, Dashboards)

Machine Learning: Scikit-learn, TensorFlow, PyTorch, XGBoost, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Model Deployment

Databases: MySQL, PostgreSQL, SQL Joins, Aggregations, CTEs, Window Functions

Tools & Deployment: Git, Jupyter Notebook, FastAPI, Docker, Streamlit, Streamlit Cloud

Analytics Concepts: EDA, Data Cleaning, Statistical Analysis, RFM Analysis, Customer Segmentation, Fraud Detection, Anomaly Detection, Predictive Modeling

PROJECTS

Stroke Risk Prediction System (End-to-End Machine Learning Pipeline)

Live Application: <https://stroke-risk-prediction12345.streamlit.app/>

- Developed an end-to-end machine learning pipeline for stroke risk prediction using healthcare data.
- Performed data preprocessing, exploratory data analysis, feature engineering, and model evaluation.
- Trained and compared multiple machine learning models; selected XGBoost based on superior predictive performance.
- Utilized CTGAN to address class imbalance and SHAP to improve model interpretability.
- Developed a FastAPI backend for model inference and integrated it with a Streamlit frontend for real-time predictions.
- Containerized deployment components using Docker and deployed the application through Streamlit Cloud.

Technologies: Python, Scikit-learn, XGBoost, FastAPI, Docker, Streamlit, CTGAN, SHAP

Fraud Detection & Risk Analytics Dashboard

- Built an Excel-based fraud analytics dashboard using the PaySim financial transaction dataset.
- Developed rule-based fraud detection logic using transaction patterns and balance inconsistencies.
- Created KPI dashboards and Pivot Table reports to analyze fraud trends and suspicious transaction behavior.
- Identified high-risk transaction categories and supported data-driven fraud monitoring recommendations.

Technologies: Excel, Pivot Tables, Data Analysis

Marketing Analytics & Customer Segmentation Dashboard

- Developed SQL and Power BI dashboards to analyze customer behavior and marketing performance.
- Applied RFM segmentation techniques to identify high-value and at-risk customer groups.
- Analyzed campaign performance, customer engagement, and revenue risk.
- Generated actionable insights to support customer retention and targeted marketing strategies.

Technologies: SQL, Power BI, RFM Analysis

PROFESSIONAL EXPERIENCE

Pharmacy Data Entry Clerk II | CVS Specialty Pharmacy | Apr 2025 – Present

- Process and validate over 1,000 healthcare records daily with 99%+ accuracy.
- Perform data validation and quality assurance checks on healthcare datasets.
- Ensure HIPAA-compliant handling of sensitive patient information.
- Support operational efficiency through accurate data entry, validation, and record maintenance.

EDUCATION

Master of Science in Data Science Eastern University | GPA: 3.92 | 2024 – 2025

Bachelor of Science in Computer Science Northeastern Illinois University | GPA: 3.82 | 2019 – 2022

CERTIFICATIONS

IBM Data Science Professional Certificate | 2023
